There is no financial impact related to this item at this time.

DISCUSSION:

The purpose of the resolution is to show support for residents that identify as Targeted Individuals by supporting the Space Preservation Act and the Space Preservation Treaty to permanently ban space-based weapons. Many targeted individuals believe they have been personally attacked with weaponry that should be outlawed by the Space Preservation Act.

Three years ago, I met Richmond resident Amy Lee Anderson about this matter. Ms. Anderson informed me she was a survivor of such horrible attacks. According to her description, these government patented technologies and weapons interfere and disrupt

the targeted individual's health physically and psychologically by remote transmission. Also, it has been brought to my attention that many survivors have reached out to their city officials peacefully, through numerous avenues of redress and accountability about these types of horrifying abuses, only to experience dismissal, being stonewalled, mocked and ignored, or a level of all out discrimination resulting in these individuals being wrongly labeled as unstable, criminals, or troublemakers.

In our city, we put forth our best efforts to listen and respect the voices, wisdom, and experiences of our residents. We will not ignore, but support those who suspect they have been exposed to these types of inhumane attacks with the intent to cause them great emotional and bodily harm. I am encouraged by these citizens who have stood up to protect our residents. I would like to encourage other officials at the local, state and national levels to explore methods to extend support to all residents.
